I

The Soling One Meter Class

The Soling One Meter is a low-cost, kit-based one-design class targeted toward getting new skippers and hobbyists involved in model yachting. The Soling Class philosophy is to provide a model suitable boat for introducing newcomers to the hobby, while offering enough performance to keep long-time model sailors interested.

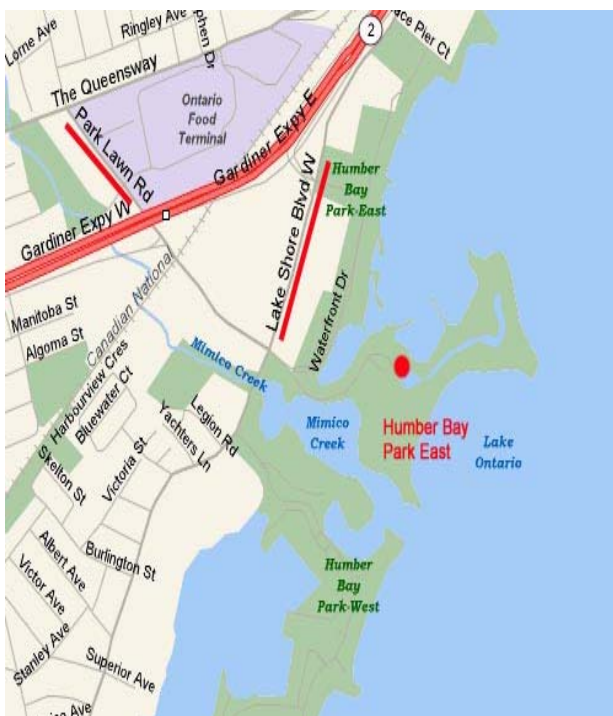

All aspects related to performance are intended to be restricted to what can be achieved by building the kit straight from the manufacturer's plans.

The boat is simple to learn to sail and easy to transport to and from the sailing site. It is the most popular class in the Metro Marine Club insuring that there are always many members with tips to help you build, tune and sail your new Soling One Meter.

I

HOW TO GET STARTED IN THE SOLING CLASS

- Come out on any Thursday to Humber Bay Pond , introduce yourself to one of our friendly sailors and try it out
- **Location:** at the end of Park Lawn Road after crossing Lake Shore Boulevard you turn right and follow the road to the parking lot. (see map below)
- Surf the internet for more information (see links on back page)
- Join Metro Marine Modellers (link on back page)
- Build your boat or ask about pre-built / used boats

See Humber Bay Park East, Toronto, ON

I CHOOSE YOUR SOLING FOR CRUISING OR RACING

Solings must be built from a kit available from a single manufacturer, [~Victor Model Products](#) of Downey, CA. Victor offers partially or fully assembled yachts. The hull and deck are vacuum formed styrene plastic, the spars are wood, sails are flat and unpaneled. The boat sails well, satisfying even veteran skippers with its balance and handling.

Costs

| | |
|-----------------------------------|-------------------|
| Soling 1m Package | \$299.95 plus tax |
| • Sailboat incl sails | |
| • 2 channel radio | |
